

INFORMATION & RESOURCES

- **FVVPF's Toolkit *Making the Connection: Domestic Violence and Public Health***

How can we engage public health leaders to respond to family violence? The Family Violence Prevention Fund has developed a tool (available on CD with an accompanying guidebook) that makes the connection between family violence and leading public health concerns and presents effective strategies for responding. This evidence-based tool offers the most relevant research on family violence, implications for select public health programs, recommended clinical and policy strategies, promising practices and resources from around the country.

This PowerPoint Presentation and accompanying guidebook helps presenters by providing evidence and "speaker's notes" for each slide to make the case for violence prevention to public health leaders. A presenter may opt to present on any of the following areas and may mix and match sections depending on their audience:

- Overview & Epidemiology
- Women's Health
- Mental Health & Substance Abuse
- Family Planning
- Sexually Transmitted Infections & HIV
- Perinatal Programs
- Breastfeeding and Nutritional Supplements
- Child and Adolescent Health
- Injury and Violence Prevention and
- Regional and Local Data on Domestic Violence

To view the online version of the toolkit or to place an order, visit <http://endabuse.org/programs/display.php3?DocID=344> or call toll-free at 1-888-Rx-ABUSE.
